Actions to Improve Education and Eliminate the **Revalidation of Studies across Countries**

Our actions enable us, without any restraint, to **observe the bad practices** carried out by countless private organizations and higher education institutions in different countries around the world, in order to encourage, motivate, and ensure that these practices are corrected; For example, we can refer to learning how to value, respect, and recognize the true meaning and honorary significance of an **Honoris Causa degree.**

The DSHC is not an academic degree; **is an honorary title recognition**, the most valuable worldwide; which shall be given to the professional or citizen that has contributed in **support and benefit of humanity**, and not for a group of people based on their academic trajectories or merits, an institution or a specific region, as countless private organizations and official educational institutions do in different parts of the world, **failing to give the value** that truly corresponds to said document in the benefit of humanity.
